

Appendix B
Fleet Policies
Group A (Web Services) matching hierarchy

Fleet policies do not have an associated VIN. All fleet policies must be associated with a FEIN. The FEIN must match the FEIN associated with the registration.

Insurance companies that sell Fleet Policies and report via web services shall follow the matching logic as specified in this document.

Primary match

DMV Registered Owner Policy Number	=	Named Insured Policy Number
DMV Registered Owner FEIN	=	Named Insured FEIN
DMV Registered Owner Name	=	Named Insured Name

If the above criteria did not result in a match, use the following criteria

DMV Registered Owner Policy Number	=	Named Insured Policy Number
DMV Registered Owner FEIN	=	Named Insured FEIN
DMV Registered Owner Name (1 st 3 characters)	=	Named Insured Name (1 st 3 characters)

An “Unconfirmed” result must provide the reason code. Queries from the NV DMV will be for the current date. The NV DMV may request a special query for a specific date up to six-months in the past. If the data is not available through web services, NV DMV will contact the insurance company and the record will have to be added to the system so NV DMV can validate the coverage. If the record can not be added to the system, an alternate method currently in the development stages will be available.
